

QP II Informal Lab Report Guidelines

QP2 TAs

January 2025

This documents is intended to provide a non-exhaustive set of guidelines for formatting and submitting your informal reports for QP2:

- These are informal reports, meaning that you do not need an introduction, methods, results, etc. Just write the question and the answer below!
- Reports are due two Tuesdays after your lab period at 11:59pm. Do not pay attention to the due date on gradescope/canvas. Please submit your lab to the correct assignment!
- When submitting to gradescope, select pages you MUST select the correct pages for each problem. (Gradescope will prompt you to do this.) The graders will only grade the pages you select for each problem.
- Be sure to show your work, including any calculations or code, make sure all pages are part of the submission and in order, and answers are clearly indicated somehow (easy to find for the graders). For example, for determining the scale using the USAF target, show screen shots of the measured line and the steps you did to determine the scale.
- All figures should be appropriately sized, numbered, and captioned. Reference image by their figure number. Tables should also be titled and numbered.
